

LSRO combines a worldwide network of experts with an experienced staff and a finely honed process to study fundamental problems in biomedicine, healthcare, nutrition, food safety and the environment. LSRO tailors its services to meet client needs by providing:

- [Comprehensive Studies](#)
- [Authoritative Reports](#)
- [Workshops, Conferences, and Symposia](#)
- [Peer Review](#)
- [Support Services](#)

Click an item above for a detailed description.

### **Comprehensive Studies**

These studies are based on the deliberations of expert panels and are known for being comprehensive, timely, balanced, objective, free from conflict of interest, state-of-the-art reviews of available science. These reports are well-written, thoroughly documented, and provide clear and transparent reasoning.

### **Authoritative Reports**

Prepared by authors selected from our worldwide network, these reports are peer reviewed. These reports are cost-effective and quick-turnaround alternatives to comprehensive studies. LSRO reports are readily accepted as authoritative by governments and the community alike because of the LSRO's reputation for independence and freedom from bureaucratic or politics encumbrances.

### **Workshops, Conferences, and Symposia**

Our conferences address topical and late-breaking issues and have been useful in uniting academia, industry, government and public interest groups to set research policy agendas.

[Back to the top](#)

### **Peer Review**

LSRO utilizes a worldwide network of scientists who embody global expertise. Because of the objectivity of our peer review, the LSRO has built an enviable reputation for freedom from bias and independence from special interest groups and politics.
